

Smart Learner Program (Secondary students and IP Program)

Smart Learner Program teaches students on efficient ways to study. Most students give little thought in their revising approach and usually find themselves either not having enough time to study or that they have difficulties remembering the content. Some of them get disappointed when they did not get their desired results after putting in much effort. Students are not formally taught in schools on how to revise for their exam and this program will be especially useful for them. The program is conducted by Dr Francis who was not an effective student in his secondary school days and learned to change his approach and subsequently excelled in his study.

Key features of the program

- Students will form their own group of 3 or 4
- The session will last 2 to 2.5 hours and addition sessions can be arranged if students need help on specific chapters
- Structure of the session includes:
 - Reviewing of existing test and exam papers to diagnose the obstacles they are facing
 - Understanding of their existing studying methods
 - Outlining the approach they should be adopting
 - Hands-on training on the approach
 - Recommended books
 - If there are time remaining, we will go through difficult topic the students currently have issues with
- Students who are currently getting average results will see improvement in their grade if they apply the techniques. Students will also realize that they have less to memorize and have more revision time.

About Breeze Education:

Breeze Education offers unique Maths and Science program to Upper Primary and Secondary students. Lessons are structured to address key bottlenecks in learning experienced by students which include lack of clarity on topic focus and the effective ways to study. Lessons are conducted by Dr Francis who has a PhD in Biomedical Science from National University of Singapore and has been conducting tuition since 2001.
